Problem 51: Drow Lasrever

Difficulty: Medium

Originally Published: Code Quest 2017

Problem Background

If you've been in a programming class for very long, you've probably been asked to reverse a line of text.

Problem Description

Have you ever been asked to reverse each word in a line of text? You have now!

Sample Input

The first line of your program's input, received from the standard input channel, will contain a positive integer representing the number of test cases. Each test case will include:

- A single line of text.

```
3
Woah, this problem seems cool!
I wonder what Lockheed Martin backwards is?
be careful
```

Sample Output

Your program should reverse each word in the line of text, preserving the placement of capital letters and any non-letter characters.

```
Haow, siht melborp smees looc!
I rednow tahw Deehkcol Nitram sdrawkcab si?
eb luferac
```
